Description
A Leap 15.X component needs to be created in weblate to collect all projects related to translating leap 15.X

History

#1 - 2022-02-24 16:05 - lkocman
- Due date set to 2022-02-25
- Assignee set to lkocman

#2 - 2022-02-24 16:07 - lkocman
I've messaged translation@lists.opensuse.org as I don't have permissions to do so.

#3 - 2022-03-01 01:00 - sbrabec
- % Done changed from 0 to 90

Done:
New component list was added:
https://l10n.opensuse.org/#list-opensuse-leap-15_4

And a missing component was added:

Changes comparing to Leap 15.3:
Added barrel.
Added desktop-file-translations-directories (It was a mistake in 15.3.)
Different branch of Release Notes.
searchPage removed. (Is there any successor?)

As in past, YaST has its own component list:
https://l10n.opensuse.org/#list-yast-master
It contains all active YaST modules except enterprise-only sap-installation-wizard.

I added Luboš Kocman to the Managers group. Please let me know, whether you can already access the requested page.

Please review the component list. Maybe there are new projects I overseen.

#4 - 2022-03-01 12:47 - lkocman
- Assignee changed from lkocman to sbrabec

Done by Stanislav

#5 - 2022-03-01 12:47 - lkocman
- Status changed from New to Resolved
