

QA - action #101722

coordination # 91646 (Blocked): [saga][epic] SUSE Maintenance QA workflows with fully automated testing, approval and release

coordination # 98457 (Resolved): [epic] Handle openqa-review reminder comments on very old jobs better

openqa-review: Do not post reminder comment in progress.opensuse.org if comment would be exactly the same as the last size:M

2021-10-29 09:34 - jbaier_cz

Status:	Resolved	Start date:	2021-10-14
Priority:	Normal	Due date:	
Assignee:	tinita	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	Ready		
Description			
Motivation			
openqa-review puts reminder comments jobs even they are multiple months old. This can be confusing to some users and the existing options in https://github.com/os-autoinst/openqa_review/blob/master/openqa_review/openqa_review.py#L196 might not be good enough for some users. Also see https://suse.slack.com/archives/C02CANHLANP/p1631255003169600 Note that this is especially about progress.o.o and not the same as #100982 .			
Acceptance criteria			
<ul style="list-style-type: none">• AC1: No comment in progress is posted if the content of the comment would be the same with same job			
Suggestions			
<ul style="list-style-type: none">• Look into openqa-review where we read data from progress and verify we have comments https://github.com/os-autoinst/openqa_review/blob/e7d3c494a2b172d6a6a61bca11a9ae3bbd52b2b5/openqa_review/openqa_review.py#L699• Reuse the code for bugzilla comments

- Subject changed from openqa-review: Do not post reminder comment in progress.opensuse.org if comment would be exactly the same as the last to openqa-review: Do not post reminder comment in progress.opensuse.org if comment would be exactly the same as the last size:M

- Status changed from New to Workable

#5 - 2021-11-04 10:17 - tinita

- Description updated

#6 - 2021-11-04 15:37 - tinita

- Status changed from *Workable* to *In Progress*
- Assignee set to *tinita*

#7 - 2021-11-05 04:10 - openqa_review

- Due date set to 2021-11-19

Setting due date based on mean cycle time of SUSE QE Tools

#8 - 2021-11-05 12:16 - tinita

I adjusted the code to retrieve comments from redmine tickets, but I have more issues to solve:

- black reports that the Issue.__init__ method is now too complex
- there is a partially covered line resulting in <100% coverage
- It's not clear how to get a HTML coverage report that tells me what exactly is not covered
- Would be nice if the CI created a HTML coverage report

#9 - 2021-11-09 16:07 - tinita

- Status changed from *In Progress* to *Feedback*

PR https://github.com/os-autoinst/openqa_review/pull/190 "Retrieve comments from redmine tickets" was merged.

PR https://github.com/os-autoinst/openqa_review/pull/191 "Document how to locally test" was merged.

#10 - 2021-11-10 09:59 - okurz

- Related to action #102200: openqa-review pipeline failed: 'NoneType' object is not subscriptable, or failed with `assert self.issue_type == "bugzilla" size:M added

#11 - 2021-11-10 15:05 - tinita

PR 190 created a regression, see also [#102200](#)

PR to fix: https://github.com/os-autoinst/openqa_review/pull/192 Ensure that last_comment_text is not None
