</tr>
</tbody>
</table>

Description

Observation

job.done is sent out to AMQP, but it takes a polling to see if there were taken over comments. the done message neither carries the initial comments nor is a comment.created event sent. Please extend the messages, so we can have a unique view without polling.

Acceptance criteria

- **AC1**: an amqp event is sent on internal comment creation
- **AC2**: an amqp event is sent on comment take-over

Suggestions

- Extend unit tests
- Extend the "AMQP" openQA plugin
  - [https://rabbit.opensuse.org/](https://rabbit.opensuse.org/)
  - [https://github.com/openSUSE/suse_msg/blob/master/amqp_infra.md#the-amqp-server](https://github.com/openSUSE/suse_msg/blob/master/amqp_infra.md#the-amqp-server)

History

#1 - 2021-12-01 18:47 - okurz
- Category set to Feature requests
- Priority changed from Normal to Low
- Target version set to Ready

#2 - 2021-12-09 10:52 - cdywan
- Subject changed from Send an AMQP message on comments taken over to Send an AMQP message on comments taken over size:M
- Description updated
- Status changed from New to Workable

#3 - 2021-12-16 12:36 - mkittler
- Assignee set to mkittler

#4 - 2021-12-16 14:53 - mkittler
- Status changed from Workable to In Progress

PR: [https://github.com/os-autoinst/openQA/pull/4411](https://github.com/os-autoinst/openQA/pull/4411)

#5 - 2021-12-17 10:54 - okurz
- Status changed from In Progress to Feedback

PR looks fine, I already approved it and coolo gave thumbs up. mkittler does not plan to work on something related right now

#6 - 2021-12-29 22:38 - okurz
PR merged. My own openSUSE AMQP CLI is currently broken so I can't test it right now

2022-09-10
Likely the unit tests are good enough. Whether the format of the messages is good enough could give feedback on.

Took me a while to see one in action :)

The "user" almost made me discard this as a manual comment, but openqa webui also lies about who made this comment. So we should be fine.

Nice, then I'm considering this done :-)
