

## qe-yast - action #105085

coordination # 105073 (Workable): [Epic] Improve logging in openQA

### [Research:24h] Identify which post\_fail\_hook is used by each module and document its action

2022-01-19 16:31 - JRivrain

<b>Status:</b> Workable	<b>Start date:</b> 2022-01-19
<b>Priority:</b> Normal	<b>Due date:</b>
<b>Assignee:</b>	<b>% Done:</b> 0%
<b>Category:</b>	<b>Estimated time:</b> 0.00 hour
<b>Target version:</b> Current	
<b>Description</b> Currently the logging in openQA is a often chaotic, sometimes redundant, sometimes some things are missing.  In order to make it more consistent, we need to identify what logs are collected by each module  <b>Scope</b> y2_installbase.pm <- y2_base.pm <- opensusebasetest.pm  <b>Acceptance criteria</b>  <b>AC1:</b> Generate a list of modules, with which post_fail_hook it uses. <b>AC2:</b> describe what logs are collected by each post_fail_hook. <b>AC3:</b> List other modules different from y2_installbase that we use in our test (to work in follow-up ticket).	

#### History

##### #1 - 2022-01-19 16:33 - JRivrain

- Subject changed from *Identify which post\_fail\_hook is used by each module in Yast group to Identify which post\_fail\_hook is used by each module in Yast group, and what it does*

##### #2 - 2022-01-19 16:34 - JRivrain

- Subject changed from *Identify which post\_fail\_hook is used by each module in Yast group, and what it does to Identify which post\_fail\_hook is used by each module in Yast group, and what it does*

##### #3 - 2022-01-19 16:39 - JRivrain

- Tags set to *qe-yast-refinement*

##### #4 - 2022-01-26 09:01 - JERiveraMoya

- Target version set to *Current*

##### #5 - 2022-02-16 07:56 - JERiveraMoya

To start we could limit the scope here to installation where we mainly use y2\_installbase.pm as parent, therefore we could check post\_fail\_hooks methods in the following files:

y2\_installbase.pm -> y2\_base.pm -> opensusebasetest.pm

##### #6 - 2022-02-16 10:23 - JERiveraMoya

- Tags deleted (*qe-yast-refinement*)

- Tracker changed from *coordination* to *action*

- Subject changed from *Identify which post\_fail\_hook is used by each module in Yast group, and what it does to [Research:24h] Identify which post\_fail\_hook is used by each module and document its action*

- Description updated

- Status changed from *New* to *Workable*
