This is an autogenerated message for openQA integration by the openqa_review script:

This bug is still referenced in a failing openQA test: offline_sles12sp5_media_sdk-asm-contm-lgm-tcm-wsm-pcm_all_full_console

To prevent further reminder comments one of the following options should be followed:

1. The test scenario is fixed by applying the bug fix to the tested product or the test is adjusted
2. The openQA job group is moved to "Released" or "EOL" (End-of-Life)
3. The bugref in the openQA scenario is removed or replaced, e.g. label:wontfix:boo1234
