Reconsider coloring of "failed modules" to make it obvious that they actually fail

2022-01-24 13:49 - okurz

Description

Motivation

Following #95479 with the new openQA feature of "force_result" it is more common to see openQA jobs where the result is passed or soft-failed while there are still failed modules. Right now e.g. in /tests/overview "failed modules" show up on a green background which could confuse people thinking of these modules as not failed. We should reconsider the coloring.

Acceptance criteria

- **AC1:** The failed modules in openQA are rendered with a more alarming design

History

<https://github.com/os-autoinst/openQA/pull/4475>

#2 - 2022-02-03 14:06 - okurz

I have waited another week but there was no further comment in the PR <https://github.com/os-autoinst/openQA/pull/4475> so I removed the not-ready label and the PR was merged.
