**Description**

**Observation**

openQA test in scenario opensuse-Tumbleweed-DVD-x86_64-desktopapps-remote-desktop-xrdp-server1@64bit_virtio fails in windows_network_setup

According to the test, it seems to expect a window, that is not popping up
Possibly related to this change:
https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/14088

**Test suite description**

The base test suite is used for job templates defined in YAML documents. It has no settings of its own.

**Reproducible**

Fails since (at least) Build 20220124

**Expected result**

Last good: 20220123 (or more recent)

**Further details**

Always latest result in this scenario: latest

**History**

#1 - 2022-01-25 15:13 - okurz
- Subject changed from test fails in windows_network_setup to [qe-sap] test fails in windows_network_setup
- Priority changed from Normal to Urgent

Couldn't find the assignee "bs-suse" here but the team tag should be "[qe-sap]".

#2 - 2022-06-23 14:38 - jstehlik
Correct assignee to be chosen together with Lee Martin.

#3 - 2022-06-24 08:08 - bschmidt
Sorry, is this still an issue?

The run following the failing one is green as well as many others after that.

old failing: https://openqa.opensuse.org/tests/2156897/modules/windows_network_setup/steps/22
recent succeeding: https://openqa.opensuse.org/tests/2433168

Some of the recent test runs are failing, butafaics not related to network setup (the part that i fixed in january).

recent failing: https://openqa.opensuse.org/tests/2407130

2022-09-04
Seems to be another issue (I think it fails in opening a power shell window).

#4 - 2022-06-24 08:15 - dimstar
- Status changed from New to Resolved

I don't think this is still an issue - there were a lot of changes around multimachine setups in the last few months which should have addressed this one too.

The results are mostly ok - the failing ones are rather 'random'

Let's close this for now.
