

openQA Project - action #105909

o3 logreports - Ignoring invalid group {"name":"123"} when creating new job

2022-02-03 17:48 - tinita

Status:	Resolved	Start date:	2022-02-03
Priority:	Normal	Due date:	
Assignee:	okurz	% Done:	0%
Category:	Feature requests	Estimated time:	0.00 hour
Target version:	Ready		
Difficulty:			
Description			
We see the following warnings on o3:			
<pre># /var/log/openqa [2022-02-01T10:13:49.572322Z] [warn] [pid:21258] Ignoring invalid group {"name":"38"} when creating new job 2170243 ... [2022-02-15T09:03:56.226220Z] [warn] [pid:11636] Ignoring invalid group {"id":"146"} when creating new job 2189548 [2022-02-15T09:09:29.985440Z] [warn] [pid:9896] Ignoring invalid group {"id":"146"} when creating new job 2189550</pre>			
Just for the record, it is not the same as #106880 .

Related to openQA Infrastructure - action #105828: 4-7 logreport emails a day...		Resolved	2022-02-03 2022-02-17

History

#1 - 2022-02-04 09:33 - okurz

- Project changed from openQA Infrastructure to openQA Project

These are all things that could be better handled by the software itself, not infrastructure issues

#2 - 2022-02-05 07:33 - okurz

- Parent task deleted (#105828)

All of these issues can be fixed but the alert ticket is addressed by preventing the alert so better not treat as subtask

<https://github.com/os-autoinst/openQA/pull/4665>

#9 - 2022-05-20 18:15 - okurz

- Due date set to 2022-06-03

PR was merged.

That actually caused a regression which I fixed in <https://github.com/os-autoinst/openQA/pull/4666>

To rollback the installation on o3 I did

```
zypper -n in --oldpackage /var/cache/zypp/packages/devel_openQA/noarch/openQA*-4.6.1653043420.03e4026-1p153.5004.1.noarch.rpm
```

and in combination for the fallout of testing <https://github.com/os-autoinst/os-autoinst/pull/1696> I did

```
result="result='failed'" failed_since="2022-05-20 17:00" ./openqa-advanced-retrigger-jobs  
worker=openqaworker7 failed_since="2022-05-20 17:00" ./openqa-advanced-retrigger-jobs
```

<https://github.com/os-autoinst/openqa-logwarn/pull/38> for the removal from monitoring ignoring.

#10 - 2022-05-23 10:07 - okurz

- Due date deleted (2022-06-03)
- Status changed from Feedback to Resolved

<https://github.com/os-autoinst/openqa-logwarn/pull/38> merged so problem solved and monitoring has the rule removed again to keep it clean.
