Description

Observation

openQA test in scenario sle-12-SP5-Server-DVD-Updates-s390x-mru-install-minimal-with-addons@s390x-kvm-sle12 fails in [await_install](#)

This job is a parent job which many child jobs depend on and are blocked if this fails, which delays the maintenance review some hours.

It fails 40-50% of the times with **timeout_exceeded** or **incomplete**.
