

QA - action #109623

coordination # 91646 (Blocked): [saga][epic] SUSE Maintenance QA workflows with fully automated testing, approval and release

coordination # 109641 (Resolved): [epic] qem-bot improvements

Allow adding scheduling settings for informal purposes that are not added to openQA jobs

2022-04-07 11:28 - okurz

Status:	Resolved	Start date:	2022-03-24
Priority:	Normal	Due date:	
Assignee:	mkittler	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	Ready		
Description			
Motivation			
See #108944#note-4			
to not overcrowd job details setting pages we should invent a special prefix which only applies to schedule variables, like we already use <code>_OBSOLETE</code> and <code>_ONLY_OBSOLETE_SAME_BUILD</code> and do not forward such variables to the job. This could even help us to streamline variables used by our tooling but not directly by test.			
Acceptance criteria			
<ul style="list-style-type: none">• AC1: specially-prefixed variables are visible in the scheduled product settings but not added as job settings			
Suggestions			
<ul style="list-style-type: none">• <code>__...</code>• <code>OPENQA_SCHEDULE...</code>• <code>OPENQA_COMMENT...</code>

#9 - 2022-04-07 14:36 - okurz

- Description updated

For more context from [#108944#note-4](#):

Why is it so hard to find out starting from an openQA job details page why that job was created [in particular for QA maintenance related jobs]?

- Scheduling settings don't contain an URL to e.g. some GitLab pipeline that did the scheduling. -> helpful in general but in the specific case we were encountering "missing jobs" rather than "wrongly scheduled jobs"
- -> When scheduling openQA tests from bot-ng add two more settings, the URL pointing to a certain incident as shown on the dashboard, e.g. <https://dashboard.gam.suse.de/incident/23309> . And as second setting the gitlab CI job URL that triggered
- -> make URL clickable on <https://openqa.suse.de/admin/productlog?id=887145> same as for the job settings page

So the point "make URL clickable" is addressed by

<https://github.com/os-autoinst/openQA/pull/4592/commits/a4bb44fd3397c89c3ffd6465062a45c04cb0726e> as part of

<https://github.com/os-autoinst/openQA/pull/4592> . Will you also look into "When scheduling openQA tests from bot-ng add two more settings"? I

guess you could add both settings near

<https://github.com/openSUSE/qem-bot/blob/7a3bd4d9dde1a6246d404d0b716a5af320d0162b/openqabot/types/incidents.py#L105> as well as

<https://github.com/openSUSE/qem-bot/blob/e4e831e242ea47d96254616bdc3a1009db41ee09/openqabot/types/aggregate.py#L154> , at best of course without duplicating.

#10 - 2022-04-07 16:22 - mkittler

- Status changed from In Progress to Feedback

Ah, you replaced the original ticket. So it wasn't just me who couldn't edit it anymore. The PR has been merged.

#11 - 2022-04-08 09:45 - mkittler

The URL displaying already works on OSD: <https://openqa.suse.de/admin/productlog?id=894293>

#12 - 2022-04-09 11:36 - okurz

- Status changed from Feedback to Resolved

Looks good on OSD now, see [#109512#note-8](#)

#13 - 2022-05-02 20:03 - okurz
