Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Feature requests		**Estimated time:**	0.00 hour
Target version:				
Difficulty:				

Description

user stories

- As a developer working on bugs I want to have access to the original jobs used for reporting to better understand the original issue of a bug
- DONE: As a QA SLE product manager I want to be able to easily find results from older important builds to review for documentation reasons like I am used to with testopia
- As a user of assets on an openQA server I want these assets to stay around for longer for tagged builds to prevent the asset getting lost while I am still relying on it, e.g. for bug investigation

acceptance criteria

- jobs "tagged" are kept around longer than non-tagged jobs
- DONE: a UI-only way exists to show only important builds but also including ones that are older than 14 days -> gh#807
- assets, e.g. isos, of tagged builds are not cleaned as agressively as untagged builds

tasks

- TODO

- Status changed from New to Resolved

this is a somewhere between resolved and rejected. Tagged jobs are kept longer, but we can't afford to keep assets longer and as such I don't want to have this implemented. Milestones have to be kept somewhere else. openqa is not an ISO archive.
