**Description**

**Motivation**

openQA test in scenario sle-15-SP3-Server-DVD-Updates-x86\_64-mau-extratests-yast2ui-textmode@64bit fails in [yast\\_lang](#)

We don't have there TIMEOUT\_SCALE=3 like in YaST group and probably we shouldn't because there is a mix of yast2 with yast test modules and potentially we could split those two types of modules, instead of bumping timeout.

**Scope**

All maintenance products where that test suite is scheduled

**Acceptance criteria**

**AC1:** Stabilize this scenario, potentially splitting.
