Description

Motivation

We need to keep O3+OSD infrastructure within NUE SRV1 up-to-date. We are limited in space there and of course we do not want to waste space, energy, etc. uno.openqanet.opensuse.org looks like it might be obsolete and unused.

Acceptance criteria

- **AC1:** uno.openqanet.opensuse.org is either properly documented and used or discarded

Suggestions

- Clarify ownership and usage of uno.openqanet.opensuse.org
- If the machine is obsolete, unused and not usable anymore ask SUSE-IT to discard it
- If the machine is actually used ensure that at least racktables is up-to-date accordingly
- Optional: Get replacement

If there is no answer then we should try to repurpose the machine or get it disposed.

No response. It seems clear we can discard the machine. Created https://sd.suse.com/servicedesk/customer/portal/1/SD-90160

https://sd.suse.com/servicedesk/customer/portal/1/SD-90160 was resolved. The machine is physically in QA cold storage but marked as "to be decommissioned" so I assume eventually it will "vanish" anyway :)
