openQA Project - action #113710

https://build.opensuse.org/package/show/devel:openQA/os-autoinst_dev and other packages should be triggered whenever git updates

2022-07-18 10:21 - okurz

Target version: future  Difficulty: 

Description

Observation

It seems that https://build.opensuse.org/package/show/devel:openQA/os-autoinst_dev and other packages within devel:openQA do not update automatically. I would expect that the packages are updated and rebuilt automatically whenever the according source, e.g. Dockerfile, changes.

No we don't, we need the trigger, IIRC token in OBS, add trigger URL in the according GitHub projects

#3 - 2022-07-18 14:37 - coolo
The two URLs in #1 are the same, no?

- Target version changed from Ready to future

#6 - 2022-08-02 17:22 - okurz
- Has duplicate action #114914: Container devel/openqa/containers/isotovideo:qemu-x86 is outdated added

#7 - 2022-08-03 06:51 - cdywan
If this is indeed a duplicate of #114914 note that updates of os-autoinst/os-autoinst code need to trigger a rebuild of devel/openqa/containers/isotovideo:qemu-x86 because the containers need to provide the latest isotovideo. And since we rely on continuous releases I would argue this needs to be Ready because it breaks container-based use cases.
