**Description**

**Observation**

openQA test in scenario sle-15-SP4-Server-DVD-Updates-x86_64-sssd_openldap_functional@64bit fails in sssd_openldap_functional

**Test suite description**

Hi,

The testcase hardcodes suse/sle:15.3 image, but tries then to install SP4 updates on it.

This fails in the openldap2 case, as openldap2 is in the legacy module in SP3, but not in the legacy module on sp4.

It probably should not hardcode 15.3, but select either 15.3 or 15.4 depending on tested service pack?

**Reproducible**

Fails since (at least) Build 20220714-1

**Expected result**

Last good: 20220712-1 (or more recent)

**Further details**

Always latest result in this scenario: latest

**Related issues:**

- Status changed from In Progress to Feedback
I cannot find openldap2 in SLE15-SP4 packages:
what I also get in the test, even if I change the container image to the latest one for 15.sp4, that the package is not found.
Am I missing anything?

#5 - 2022-07-19 07:22 - msmeissn
that openldap2 is missing is intended and wanted. (see https://jira.suse.com/browse/SLE-16553 via slack)
This also exposes this testcase bug.

#6 - 2022-07-19 13:32 - punkioudi
After having this information, we decided to drop the test sssd_openldap_functional from SLES 15-SP4.
