#6 - 2016-08-05 18:13 - okurz

- Description updated

feature is done. Remove copy-paste content. Better to refer to fate entry itself which also has a testcase.

- Status changed from New to In Progress

- Assignee changed from dgutu to michalnowak

Current state: Feature test: PASSED

@michalnowak: This has been covered by you already in the zypper_lr test but I could not find a scenario on osd where registration to (proxy-)SCC is done during installation *and* an addon is added using a medium, i.e. "Test case #3: registered system + not registered addon" in https://fate.suse.com/320494
I confirmed it looks correct in a local test I did: http://lord.arch/tests/2667#step/zypper_lr/1 but I am not sure wether this is done on osd or if zypper_lr already checks for this. Can you clarify?

#8 - 2016-08-09 08:05 - michalnowak

- Status changed from In Progress to Resolved

- Test case #1: not registered system https://openqa.suse.de/tests/502511#step/zypper_lr/11
- Test case #2: registered system + addon https://openqa.suse.de/tests/508949#step/zypper_lr/33

- Test case #3: registered system + not registered addon http://lord.arch/tests/2667#step/zypper_lr/39 (thanks for this). zypper_lr checks for this. Added as 'gnome+sdk+proxy_SCC_without_addon' to OSD.

Closing.
