

openQA Tests - action #11928

[functional][u] increase journalctl output timestamp precision

2016-05-11 13:07 - fcrozat

Status:	Resolved	Start date:	2016-05-11
Priority:	Normal	Due date:	
Assignee:	dheidler	% Done:	0%
Category:	Enhancement to existing tests	Estimated time:	42.00 hours
Target version:	Milestone 31		
Difficulty:			
Description			
Currently, journal output is done using the default output format, which is using a 1s precision range.			
I suggest to switch to "-o short-precise" which is using a microsecond precision (similar to the one used in "autoinst-log.txt").			
I'd might be even better to switch to -o short-monotonic and use a similar format in autoinst-log.txt, to make logs not dependant on the exact date/time of the VM boot			

History

- Category set to Feature requests

#2 - 2017-01-18 06:55 - coolo

- Project changed from openQA Project to openQA Tests

- Category deleted (Feature requests)

this is about something in some test - we don't use journalctl at all in openQA
