openQA Tests - action #12346

action # 9680 (Resolved): libvirt backend

action # 10204 (Resolved): zKVM Tests

minimalx on zKVM

2016-06-15 13:00 - mgriessmeier

Status:	Resolved		**Start date:**	2016-06-15
Priority:	Normal		**Due date:**	
Assignee:	mgriessmeier		**% Done:**	0%
Category:	New test		**Estimated time:**	0.00 hour
Target version:	Milestone 5			
Difficulty:				

Description

we enabled minimalX test on zKVM
But it still has some issues with IceWM, see
https://openqa.suse.de/tests/445905

History

#1 - 2016-06-15 21:28 - okurz

- Description updated

I assume you were talking about https://openqa.suse.de/tests/445905

#2 - 2016-06-17 15:45 - okurz

- Assignee set to mgriessmeier

then why did you enable minimalX tests on zkvm if they don't work? can you disable it again and add a scenario to tests development until it is working?

#3 - 2016-07-29 13:08 - okurz

- Category set to New test

- Status changed from New to In Progress

current challenge: https://openqa.suse.de/tests/445905#step/first_boot/7 looks weird. Next step to do: Just trigger one manually and check.

#4 - 2016-09-06 19:13 - okurz

Also opensuse tests can look weird: https://openqa.opensuse.org/tests/255888#step/first_boot/3

#5 - 2016-11-10 08:49 - maritawerner

Matthias, any update here?

#6 - 2016-11-10 13:21 - mgriessmeier

I'll check

#7 - 2016-11-16 14:37 - mgriessmeier

retested, checked manually and created bug for SP3 -> https://bugzilla.suse.com/show_bug.cgi?id=1010497

#8 - 2016-12-16 11:53 - okurz

- Target version set to Milestone 4

as discussed with mgriessmeier, should be done until m4

#9 - 2016-12-16 11:56 - mgriessmeier

- Target version deleted (Milestone 4)

Bugfix is in the queue, Re-Added test to Test-Development to see when it's fixed -> move it to Acceptance afterwards

#10 - 2016-12-16 11:56 - mgriessmeier

- Target version set to Milestone 4

#11 - 2017-01-13 08:58 - mgriessmeier

- Checklist item changed from to [ ] watch Testdevelopment group and move test to Acceptance once this is fixed

- Status changed from In Progress to Feedback

So for now I can't say if this will be done until Milestone 4 because
Bug was marked as resolved fixed in the meantime, but was reopened
https://bugzilla.suse.com/show_bug.cgi?id=1010497
https://bugzilla.suse.com/show_bug.cgi?id=929462

This test still lives in testdevelopment:
https://openqa.suse.de/tests/714373

I'll still set this to feedback, because it's clearly not an openQA issue and add to the checklist to move it to Acceptance once the bug is resolved

#12 - 2017-01-13 10:50 - okurz

- Target version changed from Milestone 4 to Milestone 5

nice, thank you. We should have no problems tracking this for the next milestone as the effort should be minor.

#13 - 2017-01-26 06:42 - mgriessmeier

- Status changed from Feedback to Resolved

bug is fixed, openQA test passes the first_boot and now fails in yast2_lan, which is a known issue(
https://bugzilla.opensuse.org/show_bug.cgi?id=1013605), see https://openqa.suse.de/tests/735786

-> moved to functional Server

#14 - 2017-01-26 07:04 - okurz

- Checklist item changed from [ ] watch Testdevelopment group and move test to Acceptance once this is fixed to [x] watch Testdevelopment group and move test to Acceptance once this is fixed

great work!
