Target version:			
Difficulty:			
Description			
<p>I am unable to change displayed needle. I noticed problem during needle creation, when I am not able to look at needles that did not match (select "Take image from:"). Identical problem is on test page when trying to use select "Candidate needle:".</p> <p>Sample: http://dhcp91.suse.cz/tests/1799#step/updates_packagekit_gpk/8</p>			

History

#1 - 2016-07-31 05:25 - okurz

Confirmed to have the same problem, e.g. in http://lord.arch.suse.de/tests/2339#step/finish_desktop/1
It should show a lot of candidates for "generic_desktop". This is what the job is trying to match on during run but after that, the candidates don't show.

I did not see any error messages from the webUI.

#2 - 2016-08-17 05:39 - okurz

- Project changed from openQA Tests to openQA Project

#3 - 2016-08-25 11:50 - okurz

I assume this is some kind of permission problem. I still have this with the current version of openQA on the link I posted above. On some other jobs I don't see this problem.

#4 - 2017-01-17 14:33 - okurz

- Category set to Concrete Bugs

- Status changed from New to Resolved

did not see this for some time, assuming solved implicitly. you know the drill, reopen if still there
