

openQA Tests - coordination #13040

[functional][epic][u]more flexible console test selection by addons, testsuite variable, etc. (was: Run zypper lifecycle more selectively)

2016-08-05 12:07 - RBrownSUSE

Status:	Rejected	Start date:	2016-08-05
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Enhancement to existing tests	Estimated time:	0.00 hour
Target version:	future		
Difficulty:			
Description			
As discussed in https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/1613			
"introduce a new variable to run additional console tests that need more coverage but not so much to run in every scenario.			
This needs to be set in one test suite run per product and main.pm can calculate it to run when we have ADDONS or other things."

- Blocked by action #14692: Running zypper_lifecycle on unpatched system reveals different results added

#2 - 2016-11-08 22:49 - okurz

sorry, I don't understand the module enough anymore to actually do this. Also, it's kinda blocked by [#14692](#) now. Maybe nadvornik can help.

- Related to coordination #15132: [saga][epic] Better structure of test plans in main.pm added

#6 - 2017-03-29 20:08 - okurz

- Subject changed from Run zypper lifecycle more selectively to more flexible console test selection by addons, testsuite variable, etc. (was: Run zypper lifecycle more selectively)

- Category changed from Bugs in existing tests to Enhancement to existing tests

- Priority changed from High to Normal

not going forward here but at least since the ticket was created we have [#15132](#) with better ideas regarding the testplan. We can keep this ticket for the idea how to do it.
