install vsftpd and some ftp client
- configure various ftp scenarios as described in QAM test reports (ssl, non-ssl, with users, anonymous)
- For each scenario verify uploading and downloading of files works
- Try some unprivileged access over ftp to verify there is no bug in regexp matching filters in vsftpd (as per last vsftpd update testreport)

Existing test module

```c
elsif (get_var('QAM_VSFTPD')) {
    set_var('INSTALLONLY', 1);
    if (check_var('HOSTNAME', 'server')) {
        barrier_create('VSFTPD_SUITE_READY', 2);
        barrier_create('VSFTPD_FINISHED', 2);
    }
    boot_hdd_image;
    loadtest 'network/setup_multimachine';
    loadtest 'network/vsftpd';
}
```

Task

Add existing test module network/vsftpd in a test suite in functional job group. (extra_tests_textmode)

History

#1 - 2016-09-29 15:37 - djz88
taking it

#2 - 2016-12-07 11:22 - djz88
Tests done. 
[https://openqa.suse.de/tests/658492](https://openqa.suse.de/tests/658492)

#3 - 2016-12-07 17:17 - rdodopoulos

djz88 if all the steps defined by scarabeus_iv in the description are satisfied, you can mark this ticket as resolved.

#5 - 2018-03-09 14:13 - okurz
- Subject changed from ftp integration tests to [functional]ftp integration tests
- Target version set to Milestone 18

#6 - 2018-04-30 20:34 - okurz
- Subject changed from [functional]ftp integration tests to [functional][u] ftp integration tests
- Status changed from In Progress to Workable

#7 - 2018-06-15 18:50 - okurz
- Target version changed from Milestone 18 to Milestone 18

#8 - 2018-06-28 20:47 - okurz
- Target version changed from Milestone 18 to future

#9 - 2018-10-09 13:02 - okurz
- Status changed from Workable to New

Bulk action to set status back to "New" for older tickets which are in "future". They would need to be revisited in time when we come up with a defined plan and assign to a milestone.

#10 - 2019-03-14 12:26 - okurz
- Priority changed from Normal to Low

let's focus more on improving our current tests and workflows first. Putting to "holding tank" :)

#12 - 2020-03-25 09:45 - szarate
This was already implemented, however we need to enable them for new products and check if they're running on any scenario from the U team.

#13 - 2020-03-27 08:39 - szarate
- Priority changed from Low to High

This is low hanging fruit. this can be added in extra_tests_textmode, or a better place. @Sergio What do you think?

#14 - 2020-03-30 08:52 - SLindoMansilla
- Description updated

#15 - 2020-03-30 09:16 - SLindoMansilla
- Status changed from New to Workable
- Target version changed from future to Milestone 30
- Estimated time set to 42.00 h

The s390x fail (all other architectures work fine) looks like an actual bug - so I created a report: https://bugzilla.suse.com/show_bug.cgi?id=1171185

Works find eg. on ppc64le: https://openqa.suse.de/tests/4192327#step/vsftpd/26
