openSUSE Leap 42.2 Release - action #13234

merge back maintenance updates

2016-08-17 15:53 - lnussel

Status:	Closed		**Start date:**	2016-11-07
Priority:	Normal		**Due date:**	2016-11-09
Assignee:			**% Done:**	100%
Category:	Release Engineering		**Estimated time:**	4.00 hours
Target version:	GM			

Description

maintenance updates from the update project need to be merged back into the main repo

- use osc checkupdate (https://github.com/coolo/factory-auto/osc-plugin-checkupdate.py) to find updated packages
- copy them back using 'osc copypac -e openSUSE:13.2:Update openSUSE:13.2 -m "Update to match Update channel update#."'; On purpose do it by hand without automation to avoid screwups
- adjust the release number to be higher than in the update repo using FIXME[1]
- remove updates from the update repo by using "osc killupdate NUMBER"

[1] adjust the release number by checking the state of the package 'osc getbinaries openSUSE:13.2:Update . standard x86_64' and then writting higher revision to .spec file. To submit this update to repository just use 'osc ci --noservice -m "Add revision to ensure new-enough over Update channel."'
There should be a way to do this by means of obs
