Target version: future	
Difficulty:	

Description

User story

As a non-operator I want read-only access to tables shown in admin menu to have access to database entries using a GUI

acceptance criteria

- **AC1:** User menu shows a bit more than just "logout" for non-operator users

tasks

- decide which tables can be shown but without giving edit access
- show existing tables r/o to any logged in user, edit only to operators

further details
