[LTP][OpenQA] commands: mkfs.ntfs missing

2016-12-27 11:26 - rpalethorpe

Description			
The ntfsprogs package appears to be missing in SLES 12 onwards. It exists in OpenSUSE, so we could at least run the tests there, but then we start on the path of installing different sets of packages in SLES and OpenSUSE. Furthermore I am not sure that we care about NTFS support.

I am pretty sure we should "care about" ntfs support. I personally do not know why or if ntfsprogs are missing from SLES but you could check on the build server. If it makes sense they differ then I suggest to handle it differently, i.e. handle the situation that ntfsprogs do not exist on SLES by default.

- Checklist item changed from to [] Create different install_ltp suits for x86 and ppc64, [] Investigate what is to blame for ntfs test still not running
- Status changed from Resolved to In Progress

Not only does adding the WE media break ppc64le, the test still does not run because it says NTFS is not supported.

So I have removed: ISO_2=SLE-%VERSION%-WE-DVD-%ARCH%-Build%BUILD_WE%-Media1.iso and will need to split install_ltp+sle+Server-DVD into noarch and ppc64le versions or noarch and x86 versions depending on whether WE is likely to be supported for ARM.
