- Category set to Bugs in existing tests

Please reference a link to "latest". You said "random fail" but only provided one job URL

#2 - 2017-04-20 09:09 - cachem

This is was created 22 days ago, the link was the latest at that time, 'random' can be followed from the previous. Any problem?

Sero confirmed the test itself can get pass in manually run and also get pass in beijing openQA. suspect there is something issue in openQA.suse.de or something in specific workers for this test, or some unknown product issue make the test unstable.

The problem will appear when the job is deleted due to space constraints. Then we can't find the results anymore.
