Description

Observation

openQA test in scenario sle-12-SP3-Desktop-DVD-x86_64-regression-message@64bit fails in [empathy_aim](#)

The AIM account type was not listed on openQA, I have checked manually, it is not a product bug, all the items are still there somehow openQA didn't list them all.

Reproducible

Fails since (at least) Build [0163](#)

Expected result

Last good: [0159](#) (or more recent)

Further details

Always latest result in this scenario: [latest](#)

History

[qkzhu](#), probably the qcow you used for reproducing is not cleaning enough, which had some extra packages installed? :-)

It seems not an openQA issue, telpathy-haze was not installed by default. Because -

#2 - 2017-04-05 02:34 - qkzhu

- Status changed from New to Rejected

[yfjiang](#), Yes, this is not a openQA issue and it was fixed by Frederic
