Description

Observation

openQA test in scenario opensuse-Tumbleweed-NET-x86_64-Build20170406-zdup-13.1-gnome@64bit fails in setup_zdup https://openqa.opensuse.org/tests/383148#step/setup_zdup/12 , apparently snapper is not available on 13.1 asset image.

Reproducible

Yes. Introduced by <https://github.com/os-autoinst/os-autoinst-distri-opensuse/commit/d86fedd5c025db9e8fe0a6a4e52e6f782af10a31>

Expected result

Don't run this step on zdup-13.1-gnome or create another asset image had snapper installed.

History

[mitiao: https://openqa.opensuse.org/tests/384059#step/setup_zdup/12](https://openqa.opensuse.org/tests/384059#step/setup_zdup/12) fails after your recent change. I am going to let the part not fail if snapper is not available. you can think about extending this later when you want to also test rollback on openSUSE
