Target version:			
Difficulty:			
Description			
Observation			
openQA test in scenario sle-12-SP2-Server-DVD-Incidents-x86_64-qam-minimal-full@64bit fails in install_patterns			
Reproducible			
Fails since (at least) Build : 131856.xen.4684			
Fails always.			
Expected result			
Last good: 131832.MozillaFirefox.4602 (or more recent)			
There seems to be bug in the test when xen-tools and xen-tools-domU are being installed but they conflict each other and cannot be simultaneously installed.			
Further details			
Always latest result in this scenario: latest

I opted for simply excluding the -domU package from packages to install in order to avoid the installation conflict. It is hardcoded and not especially pretty, but seems to work.

As a consequence, it however only tests the installation of the xen-tools package, not xen-tools-domU.

PR: <https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/3190>

Passing on SP2: <http://dreamyhamster.suse.cz/tests/303>

#6 - 2017-07-03 13:52 - vsvecova

- Status changed from *In Progress* to *Resolved*

- % Done changed from 50 to 100

Passed:

SP1: https://openqa.suse.de/tests/1039070#step/install_patterns/33

GA: https://openqa.suse.de/tests/1039071#step/install_patterns/36

(As coolo noted, it is expected that all the logic in <https://github.com/os-autoinst/os-autoinst-distri-opensuse/blob/master/data/lsmfip#L137> will be soon duplicated; not just domU.)
