openQA Tests - action #19056

Tests try to create filesystem on root partition instead of additional disk

2017-05-09 14:09 - mkravec

Status:	Resolved		**Start date:**	2017-05-09
Priority:	Normal		**Due date:**	
Assignee:	okurz		**% Done:**	100%
Category:	Bugs in existing tests		**Estimated time:**	0.00 hour
Target version:				
Difficulty:				

Description

https://bugzilla.suse.com/show_bug.cgi?id=1038275

Observation

openQA test in scenario sle-12-SP3-Server-DVD-ppc64le-extra_tests_in_textmode_ppc@ppc64le fails in
btrfs_qgroups

Reproducible

Fails since (at least) Build 0304

Expected result

Last good: (unknown) (or more recent)

Further details

Always latest result in this scenario: latest

- Status changed from In Progress to Resolved

okurz mentioned that ppc64le workers were updated to QEMU v2.9 which will fix the problem

#6 - 2017-05-18 10:05 - okurz

- Status changed from Resolved to In Progress

I also mentioned we have the same problem for aarch64 and AFAIK we still have qemu-2.6 there. Also, I guess malbec is still running qemu-2.6. So I reopen the ticket because we are not done here. mkravec you are welcome to unassign the ticket when you think you can't continue here.

#15 - 2017-05-23 05:59 - nicksinger

Even if Oli provided a PR here is still one failing test for reference: https://openqa.suse.de/tests/950332#step/btrfs_send_receive/6
btw: why do we not just use UUIDs here to access the HDDs?

#16 - 2017-05-23 13:32 - okurz

test failed 12h ago, PR merged 7h ago.

why not UUID? Because an unpartitioned drive does not have a UUID, only partitions have (I might be wrong).
