[functional][sle][ppc64le] search in select_patterns_and_packages cause of not released alt key

2017-05-19 14:22 - nicksinger

Status: Rejected	Start date: 2017-05-19
Priority: Normal	Due date:
Assignee: riafarov	% Done: 0%
Category: Bugs in existing tests	Estimated time: 0.00 hour
Target version:	
Difficulty:	
Description	
Observation	
openQA test in scenario sle-12-SP3-Server-DVD-ppc64le-package-dependency@ppc64le fails in select_patterns_and_packages	
The test fails to click on the search field and then cycles through the context menu. I've not investigated further why <i>exactly</i> this test misses the key press but in general I think this test can be made more solid and more bulletproof.	
Reproducible	
First occurrence looking at the last good. But it points somehow out where this tests can fail. Fails since (at least) Build 0389 (current job)	
It happened 4 non-consecutive times since the last 20 previous jobs.	
Expected result	
Last good: 0387 (or more recent)	
Further details	
Always latest result in this scenario: latest	
Workaround	
Sporadic issue -> restart the job

History

#1 - 2017-05-19 14:35 - okurz

- Subject changed from [functional] test fails in select_patterns_and_packages to [functional][sle][ppc64le] test fails in select_patterns_and_packages to click on search field -> worker or test robustness issue?

by default please provide more information in the subject line than just test fails in foo

#2 - 2017-05-22 14:13 - dgutu

Very related issue here, same worker, strange behave:

Problem is that alt key is still pressed after "alt-s" combination for search button.
