| <b>Difficulty:</b>  |                        |                        |            |
| <b>Description</b>  |                        |                        |            |
| The wireshark needles need to be updated.   |                        |                        |            |
| They are causing soft failures like:<br><a href="https://openqa.suse.de/tests/954551#step/wireshark/49">https://openqa.suse.de/tests/954551#step/wireshark/49</a> |                        |                        |            |

#### History

##### #1 - 2017-05-25 12:55 - dasantiago

I mistakenly took the soft failure as a direct cause of the needle but that's not the case.

The needles for <https://openqa.suse.de/tests/954551#step/wireshark/49> and for <https://openqa.suse.de/tests/954551#step/wireshark/48> they have the same matching area for two different wireshark options. Therefore they can cause false positive matching.

Regards,  
David Santiago

##### #2 - 2017-06-01 11:48 - dasantiago

- Status changed from New to Closed

- % Done changed from 0 to 100

Finished with the merge request [https://gitlab.suse.de/openqa/os-autoinst-needles-sles/merge\\_requests/384](https://gitlab.suse.de/openqa/os-autoinst-needles-sles/merge_requests/384)

##### #3 - 2017-06-01 11:59 - okurz

- Status changed from Closed to In Progress

Hi dasantiago, please follow the <https://progress.opensuse.org/projects/openqatests/wiki#ticket-workflow> . In the case of this ticket:

- Please reference successful jobs in the production instance (osd)
- set ticket to "Resolved" afterwards, not "Closed"

This is meant as a safety measure to not assume it is fixed while the job fails for another reason but reviewers of the job failures would see that there is a ticket reference and not look further -> deadlock :-)

##### #4 - 2017-06-01 13:56 - dasantiago

- Status changed from In Progress to Resolved

[okurz](#), thanks for the heads up.

Successful job:  
<https://openqa.suse.de/tests/973665#step/wireshark/48>
