

openQA Project - action #19388

Show bugrefs/labels/comments and filters in /tests route like /tests/overview and #previous

2017-05-26 21:03 - okurz

Status: Resolved	Start date: 2017-05-26
Priority: Normal	Due date:
Assignee: mkittler	% Done: 0%
Category: Feature requests	Estimated time: 0.00 hour
Target version:	
Difficulty:	
Description	
<h3>User story</h3>	
As a test reviewer looking for common issues in tests regardless of the products/versions/job groups I would like to see if comments exists and filter for failed jobs to find unreviewed jobs efficiently.	
<h3>acceptance criteria</h3>	
<ul style="list-style-type: none">• AC1: /tests route shows comments availability on jobs• AC2: filters are available over /tests route as well	
<h3>tasks</h3>	
<ul style="list-style-type: none">• TODO	
<h3>further details</h3>	
This should be done without duplicating all code. A side-goal should be to harmonize /tests and /tests/overview more.

History

#1 - 2017-05-26 21:03 - okurz

- Related to action #16556: Need to display "incomplete" jobs in "Previous results" added

#2 - 2017-06-09 08:59 - mkittler

- Status changed from New to In Progress

- Assignee set to mkittler

#3 - 2017-06-14 07:49 - mkittler

- Related to action #16692: [tools]Refactor controller code for server-side data tables added

#4 - 2017-06-23 10:58 - mkittler

Due to performance, the 'All tests' table should be made server-side before:

- <https://github.com/os-autoinst/openQA/pull/1373> (merged)
- <https://github.com/os-autoinst/openQA/pull/1397> (ready)
- <https://github.com/os-autoinst/openQA/pull/1375> (WIP)

#5 - 2017-07-26 12:04 - mkittler

- Status changed from In Progress to Feedback

The commit for this (<https://github.com/os-autoinst/openQA/commit/2ad797f60e76177b73a67f664916744e116581c1>) has been merged anyways.

Let's see whether it works in production.

#6 - 2017-07-26 20:03 - okurz

I think we don't run this yet on production. Also I have a problem with the changes from this PR with my local sqlite database but not on lord.arch. I guess it should be ok for now. Next step: Other icons :-)

#7 - 2017-10-04 14:39 - mkittler

Works on O3 instance (comment icon for 'Build18.49 of opensuse-5.10.90-Krypton-Live.x86_64' is shown).

AC1 only mentions comments, but no bug refs/labels. Showing refs/labels would decrease the performance even further because currently the comments would have to be parsed for this.

So I'll continue with implementing a filter similar to what we already on the test overview page. Let's see how much I can avoid duplicating the code.

#8 - 2017-10-04 14:39 - mkittler

- *Status changed from Feedback to In Progress*

#9 - 2017-10-05 14:38 - mkittler

PR for filter: <https://github.com/os-autoinst/openQA/pull/1464>

#10 - 2017-10-06 08:15 - okurz

- *Related to action #25814: load job page, e.g. test details, only on demand added*

#11 - 2017-10-24 15:07 - mkittler

- *Status changed from In Progress to Resolved*

Filter and comment icons are working on osd.

#12 - 2017-10-25 07:04 - okurz

good work. Can you create a follow-up story about the bugrefs and labels? Using the internal bug database should prevent a significant performance regression.
