

openQA Tests - action #19726

action # 20830 (Resolved): [tools][sles][functional]Get rid of version specific prefix in test suite names when the test suites also apply for other versions

[sle]Make test suite names more generic and shorter, e.g. delete "sles12_qa_acceptance" prefix

2017-06-11 06:03 - okurz

Description

There are multiple test suites which have some components in the name which are either redundant or obsolete or not add any useful information, e.g.
IMHO (okurz) "sles12_qa_acceptance_fs_stress" could just be called "fs_stress" or "stress_fs". Obviously the tests are about "qa" so we should not need that part. "acceptance" is basically also what we do unless we trigger in a test development group but the test suite can't know that so it should not have that part in the name. "sles12" will be invalidated as soon as we trigger the same test - and why shouldn't we - on sle15, so that component is also not helpful.

History

#1 - 2017-06-11 06:04 - okurz

- Subject changed from *Make test suite names more generic and shorter, e.g. delete "sles12_qa_acceptance" prefix* to *[sle]Make test suite names more generic and shorter, e.g. delete "sles12_qa_acceptance" prefix*

If anyone sees exceptions where we should keep that name part please speak up. Otherwise we should go ahead and rename test suites accordingly.

#2 - 2017-09-01 20:42 - okurz

- Status changed from *New* to *Resolved*

- Assignee set to *okurz*

- Parent task set to *#20830*
