Observation

openQA test in scenario opensuse-42.3-DVD-x86_64-gnuhealth@64bit fails in tryton_preconfigure.

Reproducible

Fails since (at least) Build 0309

Expected result

Last good: 0308 (or more recent)

Further details

Always latest result in this scenario: latest

History

#1 - 10/07/2017 10:51 am - okurz

- Status changed from New to Feedback

I'm in contact with Axel Braun, maintainer of gnuhealth in openSUSE. He will check why the server does not startup.

I would not call this a test issue. The test was working fine in before and the update to 4.2 broke it. At best we would not have accepted 4.2 of gnuhealth/tryton until this was resolved.

#2 - 13/07/2017 02:27 pm - lnussel

any feedback from him?

#3 - 13/07/2017 08:45 pm - okurz

- Status changed from Feedback to In Progress

Yes, he explained how it should work but does not have time to fix it himself. I tried but did not make it work completely. Whole setup process changed.

20/03/2020
fixed with https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/3296 and corresponding needles PR.

https://openqa.opensuse.org/tests/448749 is the first passed job on openSUSE Tumbleweed. Adding scenario to tumbleweed acceptance job group.

https://openqa.opensuse.org/tests/448766 on openSUSE Leap 42.3.
