[opensuse][x11regressions] REGRESSIONS tests are never scheduled for openSUSE; unused tomboy test modules

2017-07-25 09:39 - okurz

Status:	New	Start date:	2017-07-25
Priority:	Low	Due date:

Category:	Enhancement to existing tests	Estimated time:	0.00 hour
Target version:			
Difficulty:			

Description

All "tomboy" test modules are mentioned only in products/opensuse/main.pm but not products/sle/main.pm but there is no job running on o3 that executed these test modules. https://openqa.opensuse.org/admin/test_suites does not mention REGRESSION anywhere so that can't work.

I suggest to review the existing test modules, decide if they can be used, try out a TW test for REGRESSION and make sure the test suite is added to the TW test plan on o3 and crosscheck SLE.

History

https://bugzilla.suse.com/tr_show_case.cgi?case_id=1248874 seems to be a corresponding test case

#2 - 2017-07-25 10:17 - okurz

- Assignee set to yfjiang

yfjiang could you help with this issue? Should we delete the test cases or can you find someone that takes care?

#3 - 2021-09-01 13:55 - okurz

- Priority changed from Normal to Low

This ticket was set to "Normal" priority but was not updated within 730 days which is 2 times the period of the SLO for "Normal" tickets (365 days) as described on <https://progress.opensuse.org/projects/openqatests/wiki/Wiki#SLOs-service-level-objectives>. The ticket will be set to the next lower priority of "Low".
