The IRC log is attached.

Quick meeting summary, without any guarantee for completeness:

**Status:**

- Theo will update several machines to 42.3 on thursday
- some SLE-based machines still have to be changed to Leap or redeployed
- most people have VPN access in the meantime
- wiki move and update went smooth, new skin on en-test.opensuse.org
- 150 open tickets, only a few of them (especially member mail addresses) are urgent

**TODO list:**

- Heinlein mail - discuss next steps with the board
- fully taking over DNS (ASAP, but not urgent) - discuss with the board
- setup new mysql and postgresql clusters for openSUSE
- daily mysql and postgresql backups (#20988, #20986)
- setup backup VM doing rsnapshot backups (first "customer": wiki uploads)
- rsyslog server
- encrypted pillar - still waiting for a volunteer
- move www.opensuse.org to Nürnberg - the included openID provider https://www.opensuse.org/openid/ makes this a bit less boring. Ideally we should separate it to openid.opensuse.org if openID survives redirects
