Theme support partially broken after migration to Rails 4

2014-04-10 12:51 - ancorgs

Status:	Closed	Start date:	2014-04-10
Priority:	Normal	Due date:	
Assignee:	ancorgs	% Done:	100%
Category:		Estimated time:	2.00 hours
Target version:			
Description			
rake assets:precompile is not generating digested assets under the 'bento' subdirectory. Something subtle have changed in the asset processing.			

History

#1 - 2014-04-10 13:00 - ancorgs

Looks like the problem not only happens during assets precompilation. The "themed" assets are being loaded but only partially processed. Stylesheets seems to work perfectly. Images seems to be ignored unless a equivalent (same name) file exists in the default assets. Javascript seems to work everything but the "require" sentences. Very weird.

#2 - 2014-04-10 14:13 - ancorgs

- Status changed from *In Progress* to *Closed*

- % Done changed from 0 to 100

The javascript problems were not so big (wrong diagnosis). Introduced a workaround for the problems with the images (which look like a bug in Rails 4 to me).
