

## openQA Project - action #23404

### Serial output gets lost

2017-08-16 12:46 - dasantiago

<b>Status:</b> Resolved	<b>Start date:</b> 2017-08-16
<b>Priority:</b> Normal	<b>Due date:</b>
<b>Assignee:</b>	<b>% Done:</b> 0%
<b>Category:</b> Concrete Bugs	<b>Estimated time:</b> 0.00 hour
<b>Target version:</b>	
<b>Difficulty:</b>	
<b>Description</b> Sometimes the serial output gets lost.  This doesn't happen constantly.  Example:  COMMAND ; echo 123123-\$?- > /dev/ttyS0  and the test will fail with:  # wait_serial expected: qr/(?^:123123-\d+-)/  # Result:  even when the <i>COMMAND</i> was executed without any issues. There's no entry in the serial0.txt file.  For now only i noticed in x86_64.  This happened in the test: <a href="https://openqa.suse.de/tests/1114687#step/piglit/14">https://openqa.suse.de/tests/1114687#step/piglit/14</a>

### History

#### #1 - 2017-08-16 12:58 - okurz

- Description updated

- Category set to Concrete Bugs

#### #2 - 2017-08-16 13:00 - okurz

- Related to action #12596: s390: wait serial output in "logpackages" and "consoletest\_setup" is lost added

#### #3 - 2017-08-16 13:00 - okurz

- Related to action #13914: [qe-core][functional][ipmi] wait\_serial does not get expected output because ipmi console connection is closed added

#### #4 - 2017-08-16 13:01 - okurz

- Related to action #10534: wait\_serial fails to match special string in serial console occasionally added

#### #5 - 2017-08-17 16:17 - dasantiago

It happened again on the same piglit test: <https://openqa.suse.de/tests/1116829#>

This made me realized that it might be related with the VIRTIO console.
