History

#1 - 2017-09-07 12:26 - Inussel

- Copied from action #16996: enable openQA maintenance testing added

#2 - 2018-02-22 17:47 - Inussel

- Due date changed from 2018-03-02 to 2018-04-15
- Start date changed from 2018-02-16 to 2018-04-01

#3 - 2018-03-22 10:39 - Inussel

- Category changed from QA to QA
- Assignee set to okurz

Not sure who would take care of this nowadays but it makes sense to look into setting this up early.

#4 - 2018-04-16 13:17 - Inussel

does this work meanwhile?

#5 - 2018-04-16 21:14 - okurz

I don't think anyone has done anything here yet. I wanted to talk to coolo personally, then I forgot about it, then I missed the opportunity again, then ... sorry :(

Will address in daily jangouts call.

#6 - 2018-04-17 09:39 - Inussel

- Due date changed from 2018-04-15 to 2018-04-19
- Priority changed from Normal to High

#7 - 2018-04-19 09:17 - okurz

- Status changed from New to Feedback

coolo is reworking openSUSE maintenance tests, plan to have leap 15.0 maintenance tests after 42.3 calmed down. SLE had a "new" approach since 2017-07 which will also be applied to openSUSE tests now. Maint.+QAM plans to drive the work on the tests to have them ready for SLE15+Leap15.0

#8 - 2018-04-23 11:09 - okurz

I created openQA job groups openSUSE Leap 15.0 Updates and ... Incidents with the test plan taken over from Leap 42.3 for now:

```
for i in Incidents Updates ; do openqa-dump-templates --host https://openqa.opensuse.org --group "openSUSE Leap 42.3 $i" --full | sed -e 's/42\.3/15.0/g' > leap_15.0_$i && openqa-load-templates --host https://openqa.opensuse.org leap_15.0_$i ; done
```

And manually using the webui on <https://openqa.opensuse.org/admin/groups> put the job group in the right position as subgroup to openSUSE Leap behind the other openSUSE Leap 15.0 jobs.

Now, how to ensure the maintenance bot can make use of these? And where can I monitor the bot operating, e.g. tail logfile or screen session to attach to?

#9 - 2018-04-23 14:56 - okurz

- Related to action #35377: *dump-templates renders versions not always as string added*

#11 - 2018-04-27 08:48 - Inussel

what is the status here?

#12 - 2018-04-27 14:34 - okurz

coolo and tacit setup the openqa-maintenance bot to work aligned with the SLE workflow. test-updates are triggered, openQA tests fail due to necessary test adaption. I understood that SUSE QAM confirmed that they would take responsibility for the necessary openQA test adaptations but I have not seen effects of this so far. I would address the question again about the current state to coolo latest on next RM call, e.g. next Monday or Wednesday.

#13 - 2018-04-30 20:12 - okurz

- Related to action #35694: *[qam] test fails in welcome - Tests not adapted for "beta warning" on Leap 15 with updates added*

#14 - 2018-05-07 13:03 - Inussel

what is the status here?

#15 - 2018-05-07 15:09 - okurz

[Incidents](#) and [Updates](#) tests are in place, tests can work in principle, e.g. see [textmode](#) passing. *tacit* wanted to clarify who are the responsible persons from maintenance/QAM for adapting the openQA tests as well as regular test review. *QSF (QA SLE functional)* would stand ready for support but only for exceptional handling.

#16 - 2018-05-07 15:48 - Inussel

Looks like for `install_with_updates` the `installation/setup_online_repos` test needs to be called earlier. Could you just fix that? We really need that setup up ASAP.

other tests fail in `gnucash` due to low disk space and in applying online updates. Not sure why that happens given that the same test works in the main project.

The `kde` test fails in applying online updates due to outdated disk images which results in too many updates installed. Could you move the symlink on `openqa.o.o` forward please?

#17 - 2018-05-07 15:48 - Inussel

- % Done changed from 0 to 70

#18 - 2018-05-08 06:29 - okurz

- Status changed from Feedback to In Progress

Ok, let's see what we can do.

Done.

As `root` on `o3`:

```
cd /var/lib/openqa/share/factory/iso/fixe/
```

```
rm openSUSE-Leap-15.0-DVD-x86_64.iso
rm openSUSE-Leap-15.0-Build213.2-DVD-x86_64.iso
ln ../openSUSE-Leap-15.0-DVD-x86_64-Build235.2-Media.iso openSUSE-Leap-15.0-DVD-x86_64.iso
```

#22 - 2018-05-08 06:37 - okurz

- Related to action #35994: [functional][opensuse][y][leap15.0][fast] adapt maintenance tests for install_with_updates - test fails in setup_online_repos added

#23 - 2018-05-08 18:15 - okurz

- Status changed from In Progress to Resolved

- % Done changed from 70 to 100

incident tests are fine, update tests are also all ok with

<https://openqa.opensuse.org/tests/overview?distri=opensuse&version=15.0&build=20180508-4&groupid=55> so I guess we are done here
