#### Description

### Observation

The grub\_test should only check if grub is shown, entering the passphrase and booting the system should happen in the modules afterwards.

Might be related to the fact that no "Grub" text is shown.

openQA test in scenario sle-15-Leanos-DVD-ppc64le-cryptlvm@ppc64le fails in [grub\\_test](#)

### Reproducible

Fails since (at least) Build [96.4](#)

### Expected result

Last good: (unknown) (or more recent)

### Further details

Always latest result in this scenario: [latest](#)

#### History
