Category:	New test	Estimated time:	0.00 hour
Target version:	Milestone 11		
Difficulty:			

Description

Motivation

So far for SLE 12 we used no registration by default and only in explicit scenarios we enabled registration, e.g. "gnome+proxy_SCC".

Suggestion

New explicit test suite "skip_registration" where we skip registration and test as an "evaluation copy".

History

#1 - 2017-09-14 06:14 - okurz

- Status changed from New to Feedback

Added new test suite "skip_registration" which is overriding SCC_REGISTER= in the test suite. Added this test suite for the SLE Functional job group for machines aarch64, ppc64le, 64bit, s390-kvm, zvm-vswitch-l2, zvm-vswitch-l3, zvm-zfcp, zvm-ctc, zvm-hsi-l2, zvm-hsi-l3 as especially zVM has problems with the long SCC url. Might be a bit to much for the future so we can do less later. Also, triggered one job for SLE 15 Alpha 3 Candidate 1: <https://openqa.suse.de/tests/1168525#live>

For now only "INSTALLONLY=1", later should be extended to do a full test run.

#2 - 2017-09-20 20:35 - okurz

- Target version set to Milestone 11

#3 - 2017-10-11 12:11 - okurz

- Status changed from Feedback to In Progress

openQA test in scenario sle-15-Installer-DVD-s390x-skip_registration@s390x-kvm fails in

[force_cron_run](#)

trying to execute the cron jobs but these scripts are not available when no modules are available.

Expected result

Last good: Seems like we never reached that far in "skip_registration". I assume we should skip test module in case of "skip_registration".

#4 - 2017-10-11 12:11 - okurz

- Assignee deleted (okurz)

- Priority changed from Normal to High

not considered for current sprint but "high" prio because we have a test issue now.

#5 - 2017-10-24 14:38 - okurz

- Due date set to 2017-11-08

- Assignee set to okurz

need to check myself if we aren't done already

#6 - 2017-10-24 22:09 - okurz

- Status changed from *In Progress* to *Resolved*

commit b49b3311 (okurz/feature/new_system_roles)

Author: Oliver Kurz okurz@suse.de

Date: Wed Oct 18 11:52:30 2017 +0200

Dynamically adjust the schedule according to available system roles on SLE15

Depending on registration within the installation system roles can be available or not. This commit sets the system role if not overridden depending on registration during installation. As for 'minimal', e.g. as used in the test suite "skip_registration", only a minor subset of packages are available the test variable "INSTALLONLY" is implicitly set.
