<p>The following cases has been failed in SLE-15 phase, because tty7 in sle-15 is a constant greeting tty in gnome 3.26, clicking "alt-f2" does not pop up command running dialog.</p> <p>https://openqa.suse.de/tests/1187904#step/updates_packagekit_gpk/8</p> <p>Maybe things used in start_wayland_plasma5.pm (console('x11')->{args}->{tty} = 3) can be reused here to switch to the correct tty for continuing with the rest of testing.</p> <p>This is urgent :-)</p>
