[sle][functional][s390x][zkvm] test fails in partitioning_full_lvm as incomplete with "considering VNC stalled / connection refused"

2017-09-27 13:37 - okurz

Status:	Rejected	Start date:	2017-09-27
Priority:	Normal	Due date:	
Assignee:	okurz	% Done:	0%
Category:	Bugs in existing tests	Estimated time:	0.00 hour
Target version:			
Difficulty:			
Description			
Observation			
openQA test in scenario sle-15-Leanos-DVD-s390x-lvm-full-encrypt@zkvm fails after partitioning with incomplete			
autoinst-log.txt:			
<pre>07:24:59.6455 Debug: /var/lib/openqa/cache/tests/sle/tests/installation/partitioning_full_lvm.pm:2 2 called partition_setup::addpart 07:24:59.6457 26377 <<< testapi::check_screen(mustmatch='partition-selected-ext2-type', timeout=1) 07:24:59.8064 26379 considering VNC stalled, no update for 4.01 seconds 07:25:01.8097 26379 Error connecting to host <10.161.145.4>: IO::Socket::INET: connect: Connection refused ...</pre>			
and then incomplete			
Reproducible			
The last non-incomplete job failed in the same step without reporting any module: https://openqa.suse.de/tests/1186841			
and https://openqa.suse.de/tests/1184344 failed in the same test module being lost somewhere in send_key_until_needlematch I assume			
Expected result			
Last good: never passed this step for SLE15 it seems.			
Problem			
I assume the problem is related to that fact that the test module is not passed at all. But the error handling should be more helpful here.			
Further details			
Always latest result in this scenario: latest

History

#1 - 2017-12-01 21:14 - okurz

- Status changed from New to Rejected

- Assignee set to okurz

worker history <https://openqa.suse.de/admin/workers/761> seems to be rather clean. We are failing in the same test module in https://bugzilla.suse.com/show_bug.cgi?id=1062465 now
