Target version:			
Description			
<p>With product converter as service and multibuild it's problematic to have links and branches, so openSUSE-release handling is complicated, so we need to copy the current version from the main project in the packagelists loop. Similarly we may want to change the generation of TestDVD. We could just fetch the relevant file(s) from 000product, recompute their content and commit to rings. This is how SLE does it IIUC.</p>			

History

#1 - 2017-09-29 07:18 - dimstar

This issue was actually discussed with the OBS Team (adrian) who understands our issue.

They plan on implementing creating a link to a specific build_flavor of a _multibuild package (example given was openSUSE-release)

#2 - 2017-10-12 09:14 - Inussel

- Status changed from New to In Progress

- Assignee set to Inussel

- % Done changed from 0 to 90

scripts done. still need to document it

#3 - 2017-10-17 16:39 - Inussel

- Status changed from In Progress to Closed

- % Done changed from 90 to 100
