

openQA Tests - action #25866

coordination # 25850 (Resolved): [sle][functional][sle15][epic] new system roles

[sle][functional][easy] test fails in system_role - needle fails due to renamed default system

2017-10-09 14:46 - jorauch

Status: Resolved	Start date: 2017-10-09
Priority: High	Due date: 2017-12-06
Assignee:	% Done: 0%
Category: Bugs in existing tests	Estimated time: 0.00 hour
Target version: Milestone 12	
Difficulty:	

Description

Observation

Since it is now called minimal and not default system anymore we need to adapt the needles

openQA test in scenario sle-15-Installer-DVD-x86_64-skip_registration@64bit fails in [system_role](#)

Reproducible

Fails since (at least) Build [288.8](#)

Expected result

Should just continue the normal installation

Last good: (unknown) (or more recent)

Further details

Always latest result in this scenario: [latest](#)

History

#1 - 2017-10-09 14:54 - okurz

- Parent task set to #25850

I am not so sure about a "rename" here. "skip registration" for sure does not have access to a "default" system. This rather needs a test code update as described in [#25850](#)

#2 - 2017-10-12 08:11 - coolo

Exactly - we need to define what the expected default is. And for skip_registration it's clearly Minimal

#3 - 2017-10-13 07:36 - okurz

- Blocked by action #26038: [sle][functional][sle15] new system role - "minimal" added

#4 - 2017-10-13 07:36 - okurz

- Target version set to Milestone 12

#5 - 2017-11-08 08:41 - okurz

- Due date set to 2017-11-22

#6 - 2017-11-08 12:54 - Anonymous

- Assignee set to Anonymous

#7 - 2017-11-20 10:41 - okurz

- Due date changed from 2017-11-22 to 2017-12-06

#8 - 2017-11-21 10:04 - Anonymous

- Status changed from New to In Progress

#9 - 2017-11-21 12:34 - Anonymous

- Status changed from In Progress to Resolved

From the recent test results we can see the needle got the right name, the related test code also has clear logic.

#10 - 2017-12-05 14:51 - Anonymous

- Subject changed from *[sle][functional] test fails in system_role - needle fails due to renamed default system* to *[sle][functional][easy] test fails in system_role - needle fails due to renamed default system*
