Description

Observation

openQA test in scenario sle-15-Installer-DVD-x86_64-create_hdd_sled_gnome@64bit fails in [shutdown](#)

Reproducible

Fails since (at least) Build [288.8](#)

Further details

shutdown.pm of **create_hdd_sled_gnome** want to match **shutdown-auth** for sled15 since we have defined **SHUTDOWN_NEEDS_AUTH=1** in the medium type of sle-15-Installer-DVD. However the shutdown authentication is not expected in SLED.

In SLE 12 there are medium types for Desktop and Server respectively, but we only have one medium type called **sle-15-Installer-DVD** in SLE15.

We could fix this issues in different ways:

1. Add **SHUTDOWN_NEEDS_AUTH=0** for all testsuite of SLED, but for testsuite which is used by both Server and Desktop(eg testsuite: **gnome**) we have to add a new testsuite like **gnome-sled** or something else.
2. Set **SHUTDOWN_NEEDS_AUTH=0** in main.pm when **SLE_PRODUCT=sled**
3. Add a new medium type for SLED15

Hi [okurz](#), do you have any ideas about this?

History

#1 - 2017-10-12 04:50 - qkzhu

- Parent task set to #23886

#2 - 2017-10-24 14:35 - okurz

- Due date set to 2017-11-08

#3 - 2017-10-25 09:41 - okurz

- Subject changed from [sle15][functional][desktop] The shutdown-auth is not expected in sled15 to [sle15][desktop] The shutdown-auth is not expected in sled15

- Status changed from New to In Progress

- Assignee set to okurz

#4 - 2017-10-25 19:14 - okurz

- Subject changed from *[sle15][desktop] The shutdown-auth is not expected in sled15* to *[sle][functional][sle15][desktop] The shutdown-auth is not expected in sled15*

- Status changed from *In Progress* to *Resolved*

merged. I went with suggestion "2." here.

#5 - 2017-10-26 04:23 - qkzhu

Since we already have:

```
# SLE needs auth for shutdown
if (!defined get_var('SHUTDOWN_NEEDS_AUTH') && !is_desktop) {
  set_var('SHUTDOWN_NEEDS_AUTH', 1);
}
```

in main.pm,

we should remove **SHUTDOWN_NEEDS_AUTH=1** in the medium type of sle-15-Installer-DVD.
Otherwise SLED will still uses the default value **SHUTDOWN_NEEDS_AUTH=1**

#6 - 2017-10-26 05:34 - okurz

of course. I did now. Sorry I resolved the bug before checking everything but as we are stuck in a bug in https://openqa.suse.de/tests/1236647#step/first_boot/4 I did not want to wait until we finally reach further.
