[sle][functional][smt][sle15] test suite "smt" hardcodes SCC_REGURL pointing to Server -> need to adapt

2017-10-23 11:31 - okurz

Status:	Resolved	Start date:	2017-10-23
Priority:	Normal	Due date:	
Assignee:	JWSun	% Done:	0%
Category:	Bugs in existing tests	Estimated time:	0.00 hour
Target version:	Milestone 13		
Difficulty:			
Description			
Observation			
openQA test in scenario sle-15-Installer-DVD-x86_64-smt@64bit fails in first boot because the regurl points to "Server-*" which is invalid for SLE15 with all its modules, E.g. see the regurl in scc_registration			
Reproducible			
Fails every time reproducibly since the regurl is not pointing to a valid entry for SLE15.			
Expected result			
Last good: SLE 12 SP3 GM			
Actually we had a SLE15 job that proceeded further which is https://openqa.suse.de/tests/1193328 in build 280.1 before the rename "leanos" -> "installer" because we used the "workaround modules" added as custom repos during installation.			
Acceptance criteria			
<ul style="list-style-type: none">• AC1: Test still works for SLE12 (e.g. SP3/SP4)• AC2: Test is adapted for SLE15 or disregarded with proper reasoning			
Problem			
The test suite specifies the SCC_URL which should only be set by the medium or within the test code itself as we do for SLE15 tests already correctly in products/sle/main.pm			
Suggestions			
<ul style="list-style-type: none">• Find out if SMT as a software is still supported to be run on SLE15 or only "for" SLE15 (1-4h)• Adapt existing tests or don't trigger for SLE15 and only prepare for RMT (1-8h)			
Further details			
Always latest result in this scenario: latest

failing reproducibly in our current builds: <https://openqa.suse.de/tests/1236442#>

#4 - 2017-10-25 15:15 - okurz

- Subject changed from *[sle][functional][smt][sle15] test sute "smt" hardcodes SCC_REGURL pointing to Server -> need to adapt to [sle][functional][smt][sle15] test suite "smt" hardcodes SCC_REGURL pointing to Server -> need to adapt*

#5 - 2017-10-25 15:17 - okurz

- Priority changed from High to Normal

Removed test scenario from functional group and moved to test development for now

#6 - 2017-11-09 10:30 - okurz

- Target version set to Milestone 13

#7 - 2018-01-17 10:19 - JWSun

I think it can fixed with PR4023, <https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/4023>

#8 - 2018-01-17 10:22 - JWSun

- Status changed from In Progress to Resolved

- Assignee set to JWSun

Add SMT_URL for smt installation case.
