Description

Observation

openQA test in scenario sle-12-SP3-Server-DVD-HA-Updates-x86_64-qam-ha-install@64bit fails in [select_patterns_and_packages](#)

Reproducible

Fails since (at least) Build [1.2](#) (current job)

Expected result

Last good: (unknown) (or more recent)

Further details

Always latest result in this scenario: [latest](#)

Although variable PATTERNS contain "ha", pattern is unselected during installation. There is missing needle on-pattern-ha. There is only on-pattern-ha-text (which works during text installation).

History

#1 - 2017-11-03 12:11 - pcervinka

Fix created: https://gitlab.suse.de/openqa/os-autoinst-needles-sles/merge_requests/555

#2 - 2017-11-03 12:56 - pcervinka
