Category:	New test	Estimated time:	0.00 hour
Target version:			
Difficulty:			
Description			
<p>We are going to switch the default GNOME session to GNOME Shell after Beta3 is released(see also fate#324384). But at the same time we are also migrating test cases under x11regression to SLED15 however these cases & needles could be affected by the unimplemented feature.</p> <p>It's better to add a workaround now which will switch the default desktop session to GNOME Shell after the installation of SLED. This will help us migrate the x11regression cases for just one time.</p>			

History

#1 - 2017-11-28 02:00 - qkzhu

- Status changed from New to In Progress

- Verification run: http://10.67.17.30/tests/2033#step/sled15_workarounds/8
- PR: <https://github.com/os-autoinst/os-autoinst-distri-opensuse/pull/3952>
- Needles: https://gitlab.suse.de/openqa/os-autoinst-needles-sles/merge_requests/586

#2 - 2017-11-29 04:37 - qkzhu

- Status changed from In Progress to Resolved

Needles and cases were all merged.
