Category:	Bugs in existing tests	Estimated time:	0.00 hour
Target version:	Milestone 12		
Difficulty:			

Description

Observation

openQA test in scenario sle-15-Installer-DVD-x86_64-textmode+role_textmode@64bit fails in [apache_ssl](#)

Reproducible

Every time in sle15, probably never worked for SLE15

Expected result

Last good: [SLE 12 SP3 GM](#)

Tasks

- Research what parameters are necessary for gensslcert on SLE15 vs. the SLE12 version (<1h)
- Adapt and test openQA test module for SLE15 (1-4h)

Further details

Always latest result in this scenario: [latest](#)

behlert mentioned that test case specifically so it must be important to him :)

History

#1 - 2017-11-30 14:36 - jorauch

- Status changed from In Progress to Feedback
- Assignee set to jorauch

Looks like its fixed since two builds:

<https://openqa.suse.de/tests/1283241>

Will keep it for a few more builds just in case the problem returns

#2 - 2017-12-01 19:51 - okurz

- Target version set to Milestone 14

#3 - 2017-12-02 21:05 - okurz

- Status changed from Feedback to Resolved
- Target version changed from Milestone 14 to Milestone 12

That shouldn't be a "sporadic" problem so I don't see a problem to immediately resolve. verification run on production:

https://openqa.suse.de/tests/1288751#step/apache_ssl/36
